PROFILE

Motivated and detail-oriented Front-End Developer with hands-on experience in building responsive and user-friendly web interfaces using HTML, CSS, JavaScript, React, and Tailwind CSS. Currently enhancing problem-solving and algorithmic thinking by learning C++ and Data Structures & Algorithms (DSA). Passionate about creating visually appealing, efficient, and scalable web solutions while continuously growing as a full-stack developer.

PROJECTS

Personal portfolio website

Built a responsive portfolio with React, Tailwind CSS and Framer Motion, showcasing my skills and projects, with a custom music player for a unique user experience.

Ai Fitness App - NutriGenix

Building a React based AI powered web app that generates personalized meal plans with macronutrient details based on user data and fitness goals, displayed in responsive meal cards. It has regenerating as well as diet downloading option.

Spotify UI clone

created using HTML, CSS. A responsive front end clone of the spotify interface.

Poke Explorer

Built using HTML, CSS and java script. Fetches and displays data of 100 pokemon using a public API. Includes a filter feature to select pokemon by type from a dropdown list
